

'RattleStrap' -patent-pending.

Rattling Antler Strap

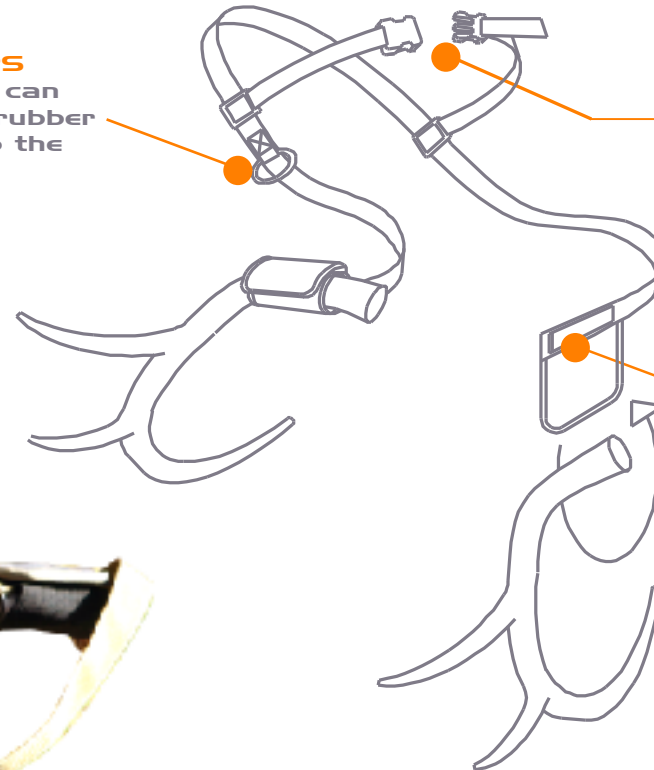

'Quick-Draw Access'

Rattling antlers can be quickly hung onto the sides of the tree. This minimizes the movement needed to hang the antlers over a hook or limb-- which will increase your shot opportunity.

HOLSTER LOOPS

The antler tines can be slid into the rubber rings sewn onto the strap.

RELEASE BUCKLE

The strap is secured to the tree with length-adjustable nylon hardware.

VELCRO HANDLE

Fabric grips can be wrapped around each antler to form a safe grip handle on the bases.
